

# Computer Security, Backup and Restoration Software

Overview

Students love computers. Be prepared with EAZ-FIX™.

Today's education institutions have a dilemma managing their computers. On the one hand, they want students to learn as much as possible, and they know students learn better and faster when they are driven by exploration and curiosity. But on the other hand, they cannot afford to allow students to freely explore the computers. They would be under siege by increasing computer problems and support requests. How can we allow students to do more and teachers to do less?

The answer is EAZ-FIX™. The most advanced software solution for maintaining a problem-free, support-free computing environment for education institutions. Based on a patent pending technology, EAZ-FIX allows students to do whatever they wish to computers while the computers fix themselves from any damage.

## Features

- Restore computer to a previous snapshot in seconds.
- Recover or synchronize files, folders with another snapshot
- Restore system and data when Operating System has failed
- Prevent unauthorized access to your data even if the disk is stolen
- Browse a snapshot for data recovery
- Customized user access control to the program features
- Hide program interface from end users
- Command line switches for network scripting
- Advanced scheduling system for automatic tasks
