The Labstar LS-150 Listening Center was designed to provide unique and much needed solutions in multimedia lab integration. The LS-150 provides listening and recording capabilities.

The LS-150 allows the user to hear their own voice through the connected headset and have excellent stereo sound!

In addition, the LS-150 is an external USB sound card for use with Laptops and other computers needing sound quality upgrades.

The LS-150 also enhances Genesis Language lab systems when a variety of computers are used. This component provides matching sound cards for the Genesis system.

Typical Application

The LS-150 is recommended for use with the

Language Lab System
